The four temples mentioned above had fallen into deterioration, and some are in grave danger as a result of centuries of age, war, and natural disasters. Consequently, in order to save the Temples from their perilous state, we have planned to conserve and restore the four temples listed above as follows:

1- Restoration

- Conducting research and compiling papers relating to the background of conservation as the fundamental document for temple restoration,
- Artistic work registration,
- Measurements preparatory to restoration,
- Excavation of an archaeological excavation for studying the temple's construction,
- Conducting a diagnosis study by mapping the land's condition prior to repair,
- Prepare on-site storage/warehouse,
- Research and discover the stone,
- Stone consolidation and treatment after restoration,
- Prior to restoration, try to install the essential elements,
- Payment of restoration materials such as sandstone, laterite, sand, and other required materials, etc.,
- Completion of the site, including cleaning, reporting, and documentation, as well as site reopening.

2-Excavation of an archeological site for temple research prior to restoration:

- Conducting a diagnosis inquiry with the maps in order to develop a technical work plan,
- Archeological site excavation with the intention of doing research on a historic building structure,
- Research regarding the living communities from the distant past,
- Diagnosing artifacts discovered during excavation,
- Archaeological data collection, documentation, and publication.

3- Ancient artifact management, collections, restoration, and conservation:

- Statistical analysis, restoration, and conservation of archeological excavation objects,
- Artifact registration at temples which isn't in order,
- Restoration of the temple's structure and carvings.
